necessary as the only practical medium by which to disclose the subject matter sought to be patented in a utility or design patent application or the subject matter of a statutory invention registration. The color drawings must be of sufficient quality such that all details in the drawings are reproducible in black and white in the printed patent. Color drawings are not permitted in international applications (see PCT Rule 11.13), or in an application, or copy thereof, submitted under the Office electronic filing system. The Office will accept color drawings in utility or design patent applications and statutory invention registrations only after granting a petition filed under this paragraph explaining why the color drawings are necessary. Any such petition must include the following:

- (i) The fee set forth in § 1.17(h);
- (ii) Three (3) sets of color drawings;
- (iii) A black and white photocopy that accurately depicts, to the extent possible, the subject matter shown in the color drawing; and
- (iv) An amendment to the specification to insert (unless the specification contains or has been previously amended to contain) the following language as the first paragraph of the brief description of the drawings:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee”.

Allowable Subject Matter

4. **Claims 1-9, 20-22, 24, 26, 34 and 49** are allowed. New numbering of claims 1 through 16.

The following is an examiner's statement of reasons for allowance: the examiner did not apply the prior art in rejection of the pending claims, because the closest prior art listed in the first Office action issued 09/29/03 as the pertinent art does not teach or fairly discloses the method of claim 1, which involves HPLC/UV-Vis chromatography of extracts from plants and animals followed by converting 3D chromatograms into colored images according to wavelengths, polarity and colors (representing concentration) with subsequent bar coding of

selected peaks for these parameters and generating a database of fingerprints and barcodes to identify the compounds in the extract.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
